

HVAC

We offer a comprehensive range to suit your HVAC requirements.

Butyl tapes are used to seal flanges and joints in ducting to prevent air leakage.

Double-sided tapes are used to seal flanges on rectangular ducting. Single-sided tapes are used to seal joints on circular ducts.

0303 – Double-sided butyl tape for sealing flanges on rectangular ducting.

0372 – Butyl tape laminated with a fixed polyethylene liner designed for sealing over ducting joints.

Foilband 0316 – Butyl tape laminated with a fixed aluminum foil backing for sealing over ducting joints.
